NAV / GPS

MCP Controls
Speed/Mach   Altitude   Heading   v/s   Autopilot Engage

CRS Heading Select

Aileron, Elevator, Rudder Trim

Autobrake Selector

Door Opener Selection

Gear Handle

Click the above items for the desired functionality.

Pedestal Explanation

Virtual Cockpit Explanation

Items are located in the same locations as the 2D panel.

Frequently Asked Questions

Q) Will my auto brakes work on landing?

A) Yes.

Q) Will my pop up spoilers work on landing?

A) Yes.

Q) Can I perform an auto-landing with the panel?

A) Yes.

Q) How do I flight plan with the panel?

A) Use the default FS2004 flight planner and navigation log. When you load the trip into the Microsoft Flight Simulator, it will automatically load into the airplane.

Q) How do I control the doors from the panel?

A) Click the door location on the door display gauge.

Q) How do I change from SPEED IAS to MACH?

A) The gauge changes automatically above and below 24,000 ft. You will need to re-select the speed or mach button to engage your speed.

Q) On decent, how do I keep from over speeding if the gauge is set to mach?

A) On decent, slow your speed from cruise of M.78, M.80 or M.82 to M.65. At crossover when the gauge switches, you will be at 290 – 300 knots. Reselect 300 knots and continue your decent.

Q) Can I make a full flight from the 2D panel?

A) Yes.

Q) Can I make a full flight from the virtual cockpit?

A) Yes.

Q) Does the panel have an FMC?

A) No.

Q) Can I program in waypoints, SIDs and STARs?

A) Yes, simply manually enter it into the default Microsoft flight planner. The waypoints will appear in the A300-600R GPS / NAV mode.

Q) How do I fly the plane, or learn the airplane speeds?

A) Please see our CLS A300-600R Flight Operations Manual. This manual is intended to show you the panel controls. Full flight operations are explained in the Operations Manual.
