

**Apron, Ramp, and Parking-Area Markings.** Aprons, ramps, and parking areas are marked to show where taxiing aircraft can and cannot go and to direct airport ground traffic.

### NOTICE!

Our diagrams of these markings, signs, and lights are conceptual only. They are not intended to be precise in every detail such as scale and measurement. Refer to the actual markings, signs, and lights in your flight simulator for applied examples.

Not all these markings, signs, and lights are used at all airports, and not all that are used at airports are reflected in flight-simulation games. Therefore, do not be disappointed if you are unable to find all these markings, signs, and lights at every airport you visit in your simulator.
